**DAVID D. O'GRADY, PH.D., ABPP**  
CLINICAL PSYCHOLOGY & NEUROPSYCHOLOGY

BOARD CERTIFIED IN CLINICAL NEUROPSYCHOLOGY  
AMERICAN BOARD OF PROFESSIONAL PSYCHOLOGY

AMERICAN ACADEMY OF CLINICAL NEUROPSYCHOLOGY  
NATIONAL ACADEMY OF NEUROPSYCHOLOGY

### **NEUROPSYCHOLOGICAL ASSOCIATE: POSITION DESCRIPTION**

Full-time office space, testing materials available for sharing, and referrals might make this a good opportunity for an early-career neuropsychologist starting a private practice. The associate will work part-time for Dr. O'Grady but is encouraged to see his or her own patients in the remaining time.

The neuropsychological associate will collaborate with Dr. David O'Grady in performing neuropsychological assessments. 15-20 hours per week. Primary responsibilities will include:

- Administer neuropsychological tests to children and adults (age 5 years and older).
- Score neuropsychological tests.
- Tabulate test results in a table of scores.
- Manage inventory of neuropsychological tests.

Additional responsibilities may include:

- Prepare written reports with interpretation of performance on neuropsychological tests.
- Assist in clinical interview of non-English-speaking examinees through interpretation and direct interview (if candidate has language skill).
- Other administrative duties as requested.

Population served: The population is demographically and diagnostically diverse, representing the full range of conditions typically seen in an outpatient neuropsychology practice.

- Pediatric clinical evaluations include patients with brain tumors, leukemia and other forms of cancer, traumatic brain injury, epilepsy, genetic disorders, complex learning disabilities, and other neurodevelopmental conditions.
- Adult clinical evaluations include patients with TBI, mild cognitive impairment, Alzheimer's disease, frontotemporal dementia, primary progressive aphasia, stroke, epilepsy, brain tumors, systemic medical conditions, and various psychiatric disorders.
- Medical-legal evaluations include examinees with TBI, neurotoxic exposure, PTSD, depression, somatic symptom disorder, and other psychiatric conditions.

Qualifications:

- Formal training and supervised clinical experience in administration of psychological and neuropsychological tests. Prefer licensed psychologist. Will consider pre-licensed with PhD or Master's degree.
